Socioeconomic benefits

The socioeconomic benefits of the adult social care sector in Northern Ireland are £12 billion, while the costs are £4.5 billion (2023). This means that for every £1 spent in the sector, there are £2.80 in socioeconomic benefits.

Notes

- * Direct are the effects created by the adult social care sector, excluding informal care.
- * Indirect are the effects created by the demand for intermediate goods and services by adult social care to provide its services.
- * Induced are the effects created by changes in the purchasing behaviour of individuals directly and indirectly employed in the adult social care sector.
- * GVA consists of the earnings of employees in formal adult social care and profits of independent care providers.
- * All values are estimated using 2023 data.
- * The sum of the values may be different from the total value given due to rounding.
- * FTE = Full Time Equivalent
